Dallas County Reports 843 Additional Positive 2019 Novel Coronavirus (COVID-19) Cases

DALLAS -- As of 11:00am August 9, 2020, Dallas County Health and Human Services is reporting 843 additional confirmed cases of 2019 novel coronavirus (COVID-19), bringing the total confirmed case count in Dallas County to 54,674, including 755 confirmed deaths. An additional 130 probable cases of COVID-19 have been reported since yesterday, bringing the total probable case count in Dallas to 2,202, including 6 probable deaths from COVID-19.

The additional 4 confirmed deaths being reported today include:

- A man in his 50's who was a resident of the City of Balch Springs. He had been critically ill in an area hospital, and did not have any underlying high risk health conditions.
- A man in his 60's who was a resident of the City of Irving. He had been critically ill in an area hospital, and had underlying high risk health conditions.
- A woman in her 60's who was a resident of the City of Dallas. She had been critically ill in an area hospital, and did not have any underlying high risk health conditions.
- A woman in her 70's who was a resident of the City of Grand Prairie. She had been critically ill in an area hospital, and had underlying high risk health conditions.

Over 2,514 children under 18 years of age have been diagnosed with confirmed COVID-19 since July 1st, including 61 children who have been hospitalized for COVID-19. Of all confirmed cases requiring hospitalization to date, more than two-thirds have been under 65 years of age. Diabetes has been an underlying high-risk health condition reported in about a third of all hospitalized patients with COVID-19.

The percentage of respiratory specimens testing positive for SARS-CoV-2 remains high, with about 15.9% of symptomatic patients presenting to area hospitals testing positive in week 30. Of the total confirmed deaths reported to date, about 28% have been associated with long-term care facilities. New cases are being reported as a daily aggregate, with a more detailed summary report updated Tuesdays and Fridays.

Local health experts use hospitalizations, ICU admissions, and ER visits as three of the key indicators in determining the COVID-19 Risk Level (color-coded risk) and corresponding guidelines for activities during our COVID-19 response. Due to weekend reporting, new data will be available on Tuesday, August 11, 2020.

The Centers for Disease Control and Prevention (CDC) recommends taking everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact outside your home: Put 6 feet of distance between yourself and people who don't live in your household.
- Cover your mouth and nose with a cloth face cover when around others and continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.
- Stay home when you are sick, except to seek medical care
- Wash your hands often and with soap and water for at least 20 seconds and help young children to do the same. If soap and water are not available, use an alcohol-base hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Clean and disinfect frequently touched objects and surfaces daily using a regular household cleaning spray or wipes.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve, not your hands. Immediately wash your hands.
- Monitor your health daily. Be alert for symptoms. Take your temperature and follow CDC guidance if symptoms develop.
